Each manuscript should be **A4 format**. The fully justified text should be formatted in two parallel columns, each 8.29 cm wide, and separated by a space of 0.63 cm. Left, right, and bottom margins should be 1.9 cm. and the top margin 2.5 cm. The font for the main body of the text should be Times 10 pt with interlinear spacing of 12 pt. **Articles must be at most 1 page in length,** excluding references.

Please do not include page numbers in your abstract.

Due to the short length of the abstract, no headings should be included.

All references within the text should be placed in parentheses containing the author's surname followed by a comma before the date of publication (Martin, 1990). If the sentence already includes the author's name, then it is only necessary to put the date in parentheses: Martin (1990). When several authors are cited, those references should be separated with a semicolon: (Martin, 1990; Castor & Pollux, 1992). When the reference has more than three authors, only cite the name of the first author followed by et al.

All figures should be centred and clearly distinguishable. They should never be drawn by hand, and the lines must be very dark in order to ensure a high-quality printed version. Figures should be numbered in the text, and have a caption in Times 10 pt underneath. A space must be left between each figure and its respective caption.

Figure and caption should always appear together on the same page. Large figures can be centred, using a full page.

The instructions for tables are the same as for figures (see previous paragraph).

Table 1: Caption.

Footnotes are indicated within the text by a number in superscript.¹

Place all acknowledgements (including those concerning research grants and funding) in a separate section at the end of the article. Acknowledgements are not part of the content.

¹ They should be in Times New Roman 9, and appear at the bottom of the same page as their corresponding number. Footnotes should also be separated from the rest of the text by a horizontal line 5cm long.

References

Bibliographical references should be listed in alphabetical order at the end of the article. The title of the section, "References", should be a level 1 heading. The first line of each bibliographical reference should be justified to the left of the column, and the rest of the entry should be indented by 0.35 cm.

The following examples (of fictitious references) illustrate the basic format required for articles in conference proceedings, books, journal articles, Ph.D. theses, and chapters of books respectively.
