Translation—Symbolic Methods

1

## Abstraction

Elimination of

- Special cases
- Exceptions

Spelling rules  
Punctuation  
Declensions  
Conjugations  
Cases  
Prepositions  
Moods  
...

Martin Kay

Translation—Symbolic Methods

2

## Morphographemic Abstraction

walking	=	walk	+	+ing
rubbing	=	rub	+	+ing
walks	=	walk	+	+s
tries	=	try	+	+s

Spelling idiosyncracies no longer matter

no longer get in the way

Martin Kay

Translation—Symbolic Methods

3

## Morphographemics

Kind	Kinder	Kindern
love	loves	loving
run	runs	running
manger	mange	mangeons
try	trying	tries
tie	tying	ties
medico		medici
arco		arche

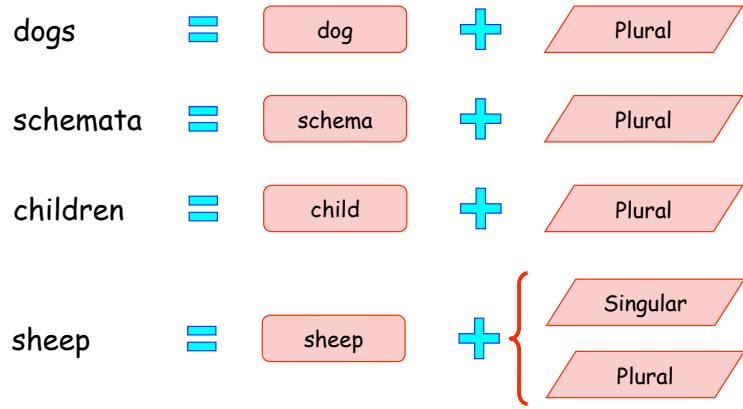

Diacritics

Martin Kay

Translation—Symbolic Methods

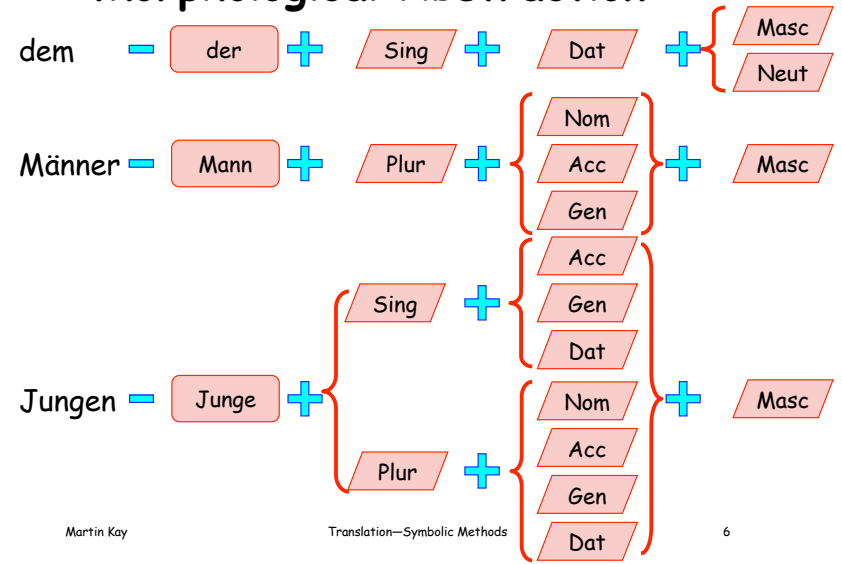

4

# Morphological Abstraction

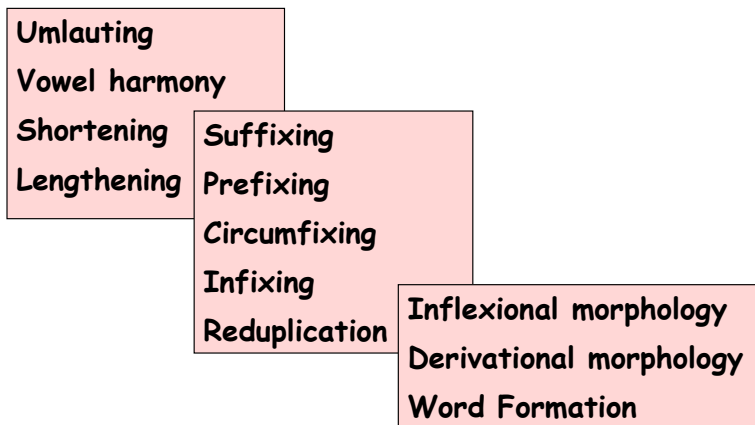

Paradigms and exceptions no longer matter

# Morphological Abstraction

# Word-level Processes

# Syntactic Abstraction

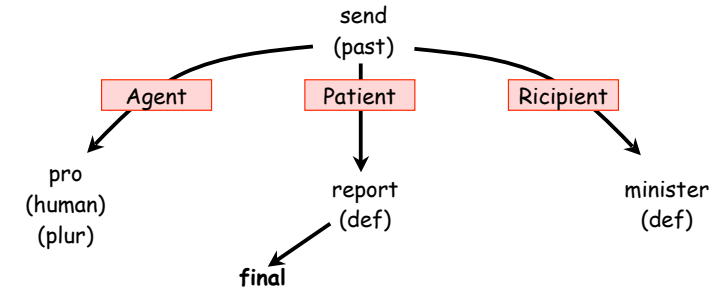

They sent the final report to the minister

They sent the minister the final report

The final report, they sent to the minister

To the minister they sent the final report

The final report was sent to the minister (by them)

# Syntactic Abstraction

How much abstraction is enough/too much?

Information structure

John gave this perfect stranger a lot of money  
John gave a lot of money to this perfect stranger  
Broccoli, I cannot stand!  
One thing I cannot stand is broccoli.  
It is Ivan that caused all the trouble in the first place.  
The more broccoli there is, the less I like it.

# Topicalization

What does it *mean* in English/German?

# Other Levels

His clever brother always stood in his light

Er stand immer im schatten seines klugen Bruders

He will not be here until Monday

Er wird erst Montag da sein

Cela vous plait?

Do you like that?

Hans schwimmt gern

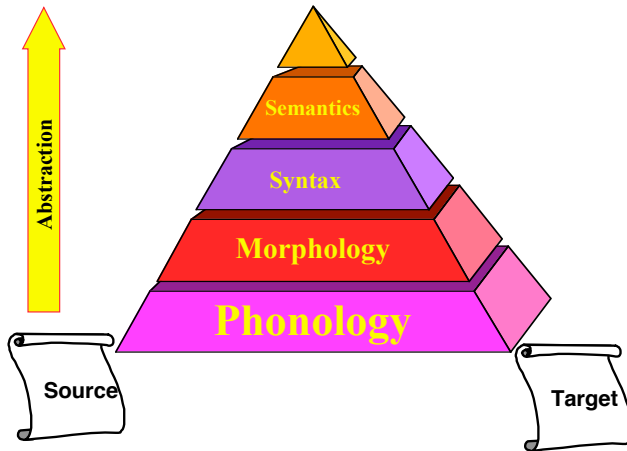

Hans likes swimming/to swim

# Syntax? — Adjective order

Opinion	Size	Age	Shape	Color	Origin	Material	Purpose	
Fine	big	old		blue	Mexican	wooden	storage	boxes
Funny	little		round				meeting	room
					farm	vegetable		product

How to classify  
organic  
recursive  
soft  
running  
... ?

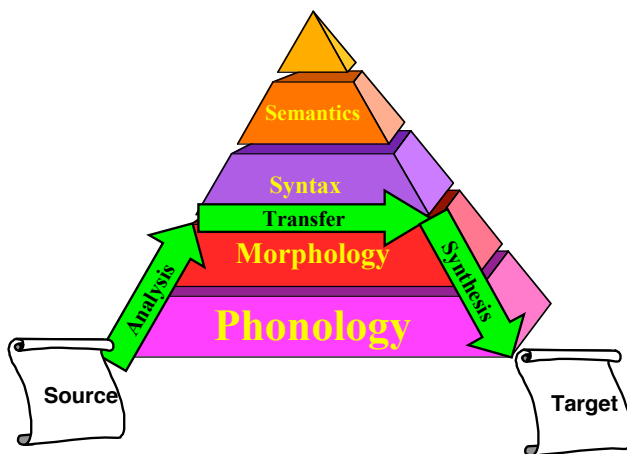

## The Vauquois Triangle

## The Transfer Approach

Analyze to some level of abstraction  $L$   
Transfer  
Generate

## The Vauquois Triangle

## Commercial Systems

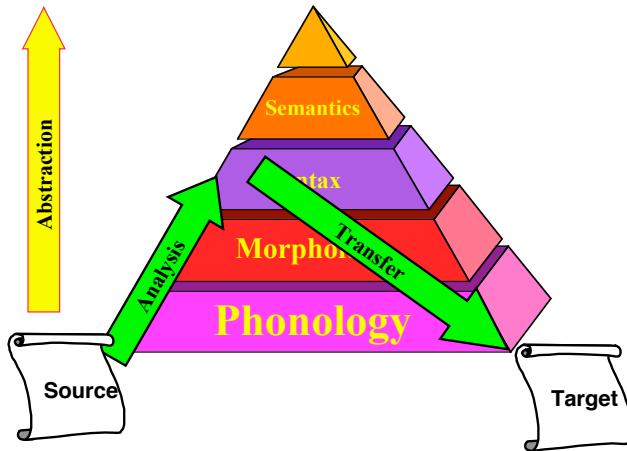

Do not follow the model closely:

- Levels of abstraction are
  - Not strongly separated
  - Are weakly formalized at best
- Generation Levels are largely eliminated

Are almost entirely deterministic

Aim for speed

## The Vauquois Triangle

Martin Key

Translation—Symbolic Methods

17

## The Standard Approach

Martin Key

Translation—Symbolic Methods

18

## Commercial Systems

### Rely on

- Tuning the lexicon to the domain
- Huge inventories of set phrases
- Selectional restrictions

Martin Key

Translation—Symbolic Methods

19

## Commercial Systems

### • Weak points

- Early binding — no nondeterminism
- Result will, in general, be ungrammatical

Martin Key

Translation—Symbolic Methods

20

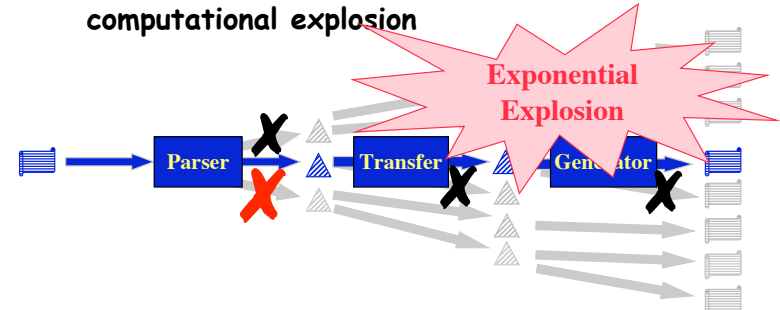

# The Standard Approach

Separate modules for simplicity, maintainability, reuse

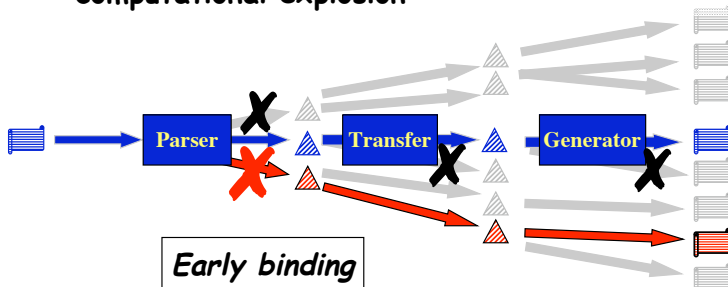

# The Standard Approach

Separate modules for simplicity, maintainability, reuse  
 Heuristic filters are applied early to avoid computational explosion

# The Standard Approach

Separate modules for simplicity, maintainability, reuse  
 Heuristic filters are applied early to avoid computational explosion

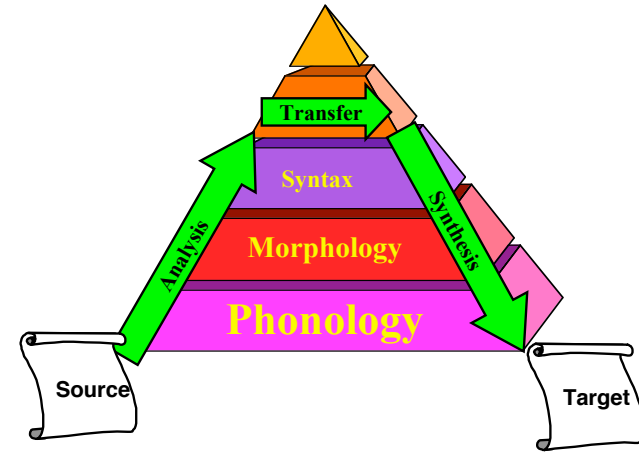

# Assessment of the Standard Approach

- Robust
- Can produce *word salad*
- *Ad hoc* and hard to maintain
- Bilingual and unidirectional

## Academic Approaches

- More abstraction — appeal to AI
- Equal weight to analysis and generation
- Formalisation
- Avoid early binding

## Academic Approaches

## Academic Approaches

### Problems

Time

Robstness

Ambiguity

## Linguistics

Can identify

But not resolve

**Ambiguity**

## The Vauquois Triangle

What is this?

Martin Kay

Translation—Symbolic Methods

29

## The Vauquois Triangle

# Interlingua

Martin Kay

Translation—Symbolic Methods

30

## If you abstract enough

You will be left with Pure Thought

OK. So what is wrong with that?

Martin Kay

Translation—Symbolic Methods

31

## Interlingua must

- Represent whatever any language can represent, even if it will often be lost in translation.
- Problems of (non)overlap in the semantic grid.

Martin Kay

Translation—Symbolic Methods
