## INTRODUCTION

We have pleasure in offering to the Members of the Third International Congress of Phonetic Sciences and to the other interested readers, the Proceedings of this Congress.

The collection of the papers and the further completion of this volume were done in the same spirit of hearty collaboration over all frontiers, which characterized the Congress itself.

Information about the realization and the course of the Congress may be found in the addresses which are printed at the beginning of the Proceedings.

We considered it a pious duty to print at the end of this book the summary of the paper Prof. TRUBETZKOY intended to read at the Congress together with a photograph of deceased. After that, follows a motion presented by Prof. BAADER and a note of Prof. BURSSSENS to illustrate his demonstration; further the report on the Business Meeting of the Congress by Miss Dr. L. KAISER, on the „Association Internationale pour les Etudes Phonologiques”, by Prof. A. MARTINET, and the general report on the Demonstrations and Exhibits and on the Entertainments and Social Functions.

We are indebted to the printer (G. Michiels-Broeders, Tongeren) for the special care he bestowed on this volume.

We express our repeated thanks to all those who enabled us to issue the present publication, especially to the Authorities of the University of Ghent.

E. BLANQUAERT — WILLEM PÉE.
