## Relation Extraction Exercises<sup>1</sup>

- 1. Please list the differences between the information extraction task and the full text understanding task. Describe one well-known information extraction system and specify its core system architecture.***

---

<sup>1</sup> provided by Feiyu Xu ([feiyu@dfki.de](mailto:feiyu@dfki.de))

## 2. Please calculate Precision and Recall of the following information extraction task.

$$\text{Precision} = \frac{\text{correct answers extracted by the system}}{\text{all answers extracted by the system}}$$

$$\text{Recall} = \frac{\text{correct answers extracted by the system}}{\text{total possible answers}}$$

### Text

1. For years, Microsoft Corporation CEO Bill Gates railed against the economic philosophy of open-source software with Orwellian fervor, denouncing its communal licensing as a "cancer" that stifled technological innovation.
2. Today, Microsoft claims to "love" the open-source concept, by which software code is made public to encourage improvement and development by outside programmers. Gates himself says Microsoft will gladly disclose its crown jewels--the coveted code behind the Windows operating system--to select customers.
3. "We can be open source. We love the concept of shared source," said Bill Veghte, a Microsoft VP. "That's a super-important shift for us in terms of code access."
4. Richard Stallman, founder of the Free Software Foundation, countered saying...

### Possible Answers distributed in the different paragraphs

1. For years, Microsoft Corporation CEO Bill Gates railed against the economic philosophy of open-source software with Orwellian fervor, denouncing its communal licensing as a "cancer" that stifled technological innovation.
2. Today, claims to "love" the open-source concept, by which software code is made public to encourage improvement and development by outside programmers. Gates himself says Microsoft will gladly disclose its crown jewels--the coveted code behind the Windows operating system--to select customers.
3. "We can be open source. We love the concept of shared source," said Bill Veghte, a Microsoft VP. "That's a super-important shift for us in terms of code access."
4. Richard Stallman, founder of the Free Software Foundation, countered saying...

**In the following, we list all possible names and their types in each paragraph**

1. Microsoft Corporation (organization name), CEO (title/position name), Bill Gates (person name)
2. Microsoft (organization name), Gates (person name)
3. Bill Veghte (person name), Microsoft (organization name), VP (title/position name)
4. Richard Stallman (person name), founder (title/position name), Free Software Foundation (organization name)

**Answers exacted by the System**

1. For years, Microsoft Corporation CEO Bill Gates railed against the economic philosophy of open-source software with Orwellian fervor, denouncing its communal licensing as a "cancer" that stifled technological innovation.
2. Today, claims to "love" the open-source concept, by which software code is made public to encourage improvement and development by outside programmers. Gates himself says Microsoft will gladly disclose its crown jewels--the coveted code behind the Windows operating system--to select customers.
3. "We can be open source. We love the concept of shared source," said Bill Veghte, a Microsoft VP. "That's a super-important shift for us in terms of code access."
4. Richard Stallman, founder of the Free Software Foundation, countered saying...

**In the following, we list all the extracted names and their types in each paragraph**

1. Microsoft Corporation (organization name), CEO (title/position name), Bill Gates (person name), Orwellian (person name)
2. Windows (person name)
3. Bill Veghte (person name), Microsoft VP (person name)
4. Richard Stallman (person name), founder (title/position name), Free Software Foundation (organization name)

Please calculate for each name type the precision and recall values of the named recognition task of the system.

Name Types	Precision	Recall
Person Name		
Organization Name		
Title/Position Name		

### ***3. Information Extraction in the Management Succession Domain***

#### **Text for Information Extraction**

1. Cash-strapped Figgie International Inc. eliminated its quarterly dividend and received a temporary cash infusion from a new lender.
2. The Willoughby, Ohio, industrial company also named a longtime outside director as a new vice chairman, although it stopped short of bringing in a total outsider to bolster management.
3. Meanwhile, Figgie signaled that its 1993 operating losses and year-end adjustments would be greater than previously expected when reported in two to three weeks.
4. The company's Class A share fell \$1.875, or 15%, to \$10.875 in Nasdaq Stock Market trading.
5. The conglomerate said it received a new \$40 million, one-year renewable loan from CIT Group, which is secured by receivables. That eliminated the need to ask its other banks, which have extended a \$150 million credit line, for more funds. "With CIT's support, we have addressed our near-term cash flow needs while we continue to put into place the elements of a more comprehensive deleveraging of the balance sheet," Chairman Harry E. Figgie Jr. said in a statement.
6. Nevertheless, Figgie sought to calm its syndicate of bankers at a meeting yesterday. The bankers expressed concerns about the company's financial plight and the need for new management, according to a person who attended the meeting. A company spokesman confirmed that those issues were discussed, but said they were "not representative of the whole meeting."
7. Wall Street was hoping for stronger outside management to help Figgie. Instead, the company named a director, 66-year-old Walter M. Vannoy, who has been on the board since 1981. Although the current vice chairman, Harry E. Figgie III, 40, will continue to hold that title, Mr. Vannoy will be second in command, the company said.
8. Mr. Vannoy formerly served as vice chairman of McDermott International Inc. and as president and chief operating officer of Babcock & Wilcox.
9. The company said suspension of the six-cents-a-share quarterly dividend, which would have been payable in March on both Class A and Class B common stock, will save it about \$4 million a year. "The board felt the dividend suspension was prudent until we effect a profitability turnaround."
10. The actions, coupled with the company's previously announced plan to sell its Rawlings Sporting Goods division and two other divisions, are the first phase of a turnaround plan to be disclosed within the next two weeks, Figgie said. Among other things, the company wants to lop \$200 million off its \$450 million of debt this year.

a. Named entity recognition

Please extract all names of the following types from the above text and specify the paragraph number, where the name occurs.

- i. Person names, e.g., **Walter M. Vannoy (7)**
- ii. Location names, e.g., **Ohio (2)**,
- iii. Company/organization names, e.g., **Figgie International Inc. (1)**
- iv. Position names, e.g., **director (2)**, **vice chairman (2)**

b. Relation recognition

Please extract the person-position and person-company relations from the above texts

- i. Person-Position Relationships: a relationship between a person and his position in a company

Person	Position

- ii. Person-Company Relationships: the affiliation of a specific person

Person	Company

c. Filling templates

Please try to fill the following database records by extracting corresponding information from the above text. The database record corresponds to a management succession event, which contains four attributes

- i. Person In: person, who is named for the position
- ii. Person Out: person, who resigned from the position
- iii. Position: position, which needs a personnel change
- iv. Company: company or organization, where the personnel changes take place
- v. Time: when the personnel change takes place

Person IN	Person OUT	Position	Company	Time

- d. Identify linguistic patterns as relation extraction rules for Person\_In, Person\_Out, Person\_Company
