

Praat Scripting

Exercise 08

1. Create an ExperimentMFC helping you investigate whether your participants hear a long, tense vowel or a short, lax vowel. Use the already cut minimal pairs from exercise 04 (keep in mind that you can only use real minimal pairs).
2. Randomize your stimuli and include a replay button
3. Include an instruction as well as runText, pauseText, and endText
4. Display response buttons that change accordingly to the played vowe/word
5. Include a goodness rating
