

Praat Scripting

Exercise 11

1. Go back to the created perception experiment from chapter 06 ExperimentMFC. Try to recreate the perception experiment using the Demo Window but do not include a goodness rating.
2. Highlight the button that has been clicked and give the user the possibility to change his/her answer before going to the next word.
3. Indicate the number of files in the upper left corner.
4. The Next button should only be active after the user made a decision. Change the appearance of the Next button after a decision was made to indicate that the button is active.
